

Classic Pipe and Cable Locators

Over three decades, thousands of users can't be wrong. They rely on Pipehorn for these reasons.

● **Finds what others can't**

- Cast/ductile iron
- Tracer wire
- Detectable tape
- Parking lot/Street lamp lines
- Short side services

● **Best inductive locator**

- Search and sweep
- Finds it all
- No hook up necessary, even on difficult conductors

● **Simple** - One hand/one control design combined with heads up operation makes it easy to learn and simple to operate.

● **Durable** - Time tested and field proven, leading the industry with a three year warranty.

The only thing more accurate is a shovel.

Classic Pipehorn 100 - priced and built for the back of every truck

- Quickly sweep an area to find all conductors and trace without hooking-up
- The original "stand-up" locator that's easy on your back
- Simple to operate with only one control
- Field-proven design that gets the job done day after day

 Battery: 6 "AA" alkaline

Receiver

Battery: One 9-volt
 Weight: 2.9 lbs. (1.3 kg)
 Output: Audible from speaker

Includes Conductive cables
 Earphone
 Foam lined plastic case

Dual-Frequency Pipehorn 500 - the locator for the tough jobs

- Accurately isolate target lines in congested areas with a powerful low frequency transmitter
- Locate two lines at one time
- Perform long distance locates on good conductors
- Select the right frequency to make your job easier
- Easy to operate and rugged, just like the Classic Pipehorn 100

Transmitters

Frequencies: 9 kHz and 480 kHz
 Modes: Inductive, conductive, & signal clamp

Receiver

Battery: One 9-volt
 Weight: 3.4 lbs. (1.5 kg)
 Output: Audible from speaker

Includes Conductive cables (2 sets)
 Earphone, Ground tee
 Solid wooden case

Accessories

Signal Clamp

- Induce LF signal on lines where direct connection is not possible.

Pulsar Beacon

- Locates damage points in pipe or duct.
- Works in ducts as small as 1/4" dia.

Valve Box Finder

- Locate valve boxes or manhole covers lost due to pave over or back fill.
